

TopStrap® WS

TopStrap - woven WS strap
from 13 to 32 mm and 375 kp to 1600 kp

Our TopStrap® *Wovenstrap WS* are made in a for this products well designed weaving process out of really special high tensile polyester yarn for various demanding applications.

Through the extreme flexibility and resistance against splicing, the TopStrap® WS offers you the optimal solution for goods in loading and securing.

Because of the special textile surface, texture and material, TopStrap® WS is ideal for particularly gentle surfaces, therefore even for your highly sensitive goods.

TopStrap® straps are resistant against weathering, corrosion, acid, oxidation, chemical and water.

These optimal features make them flexible and are an optimal solution for different applications.

Even in extreme environments, such as cooling chambers are TopStrap® straps the first choice.
